

**Date:** January 18, 2017

**To:** Mayor and Council

**From:** Jeff Brown, Community Health Administrator

**Subject:** Local Public Health Services Agreement

**Action Requested:**

Adopt Resolution Number 2017-10 to approve 2017 Local Public Health Services Agreement between Edina and Bloomington.

**Information / Background:**

The 2017 contract amount is \$216,548.00 which allows for a 3% increase from 2016. The costs for these services are defrayed by Edina's 2017 Local Public Health Grant funding of \$118,977 and the local general fund match required by the Local Public Health Act.

Bloomington Public Health (BPH) delivers services to Edina residents of all ages through senior health promotion, vulnerable adult assessments, public health nurse clinics, high risk home assessments, and community health educational opportunities. In addition, BPH works closely with Edina schools and daycares to increase youth assets and help prevent high risk behaviors, provide outreach to new parents with high risk children, and administer the WIC Program, a food and nutrition program for pregnant women, infants and children in need. Services such as health screenings, health promotions and immunizations for elderly are coordinated with the Edina Senior Center and senior living complexes. Public health nurses also coordinate with Edina Police, Fire and Health Departments regarding vulnerable adult assessments, partner with the Edina Resource Center to connect residents with resources and services, and counsel with parish nurses and faith communities.

The City Attorney has reviewed and approved the agreement.
