I attended the first meeting. Thank you. I like the idea of a combined walk/bike lane as well as landscaping to better insure safety.

Intentionally narrowing of Edina roads should be a crime! Wyman, Maddox, Valley View is shameful. You purposely made the roads less safe, due to too narrow, especially in winter. This practice needs to stop.

I want to minimize the width of the road from France to Xerxes because those homes are already so close to the road. I'm also opposed to adding bus routes or anything that would increase traffic volume through this neighborhood.

I am concerned about how to redirect traffic away from the intersection of 58th / Xerxes. The sightlines are horrible, the traffic speed is aggressive, the traffic flow is uninterrupted, backups west on 58th trap me in my driveway for up to 10 minutes!

If sidewalks are installed will the city provide snow plowing. I am also concerned about construction impacts on trees.
